We are proudly introducing Impactshield to our range

Dear Valued Customer,

In line with our vision to always be our customers' best supplier and our commitment to innovation, we are excited to let you know that we have reviewed our technical plasterboards and can proudly introduce **Impactshield** to the Siniat range.

Available as a made-to-order product from 1 March

With the introduction of Impactshield we can offer a value solution for commercial and residential wall applications that require soft and hard body impact resistance, fire resistance and good acoustic performance.

Impactshield replaces Fireshield Heavy in the Siniat plasterboard range. It is supplied with an identifiable green liner paper and can be used to substitute Fireshield in a Siniat system while maintaining the FRL.

Key benefits:

- Value proposition for customers requiring soft and hard body impact resistance
- Perfect for hospitals, schools and affordable housing projects

- Good acoustic performance
- Can substitute [Fireshield](#) in a Siniat system while maintaining the FRL
- GreenTag GreenRate Level A certified

*** Please note that Impactshield is a made-to-order product and currently not available in WA.**

Impactshield has a denser core than [Multishield](#) resulting in the higher impact resistance, but [Trurock](#) and [Trurock HD](#) continue to meet the requirements for ultimate impact resistance in more demanding areas. With its reinforced core mesh, Trurock HD is still the best choice for large hard body impact areas.

The following assets have been added and updated to include Impactshield from 1st March:

- [Product catalogue](#)
- [Product data sheet](#)
- [Website](#)

Impactshield will be included in the next version of Blueprint, due out soon.

We will launch Impactshield to the market by means of advertising and social media content over the coming weeks.

For more information about the product or the launch, please contact us by replying to this email. For more information about pricing, please contact your channel account manager in the first instance.

Kind Regards,
The Siniat Team
